OF THE

GEOGRAPHY

OF THE

ANCIENTS,

As contained in

The *Greek* and *Latin Classicks.*

WHEREIN

The Several Empires, Kingdoms and Provinces, the Chief Cities, Towns, Rivers and Mountains mention'd in *Herodotus*, *Homer*, *Justin*, *Virgil*, *Ovid*, *Florus*, *Nepos*, *Cæsar*, *Livy*, *Lucan*, *Plutarch*, and many other Ancient Authors, are represented.

An Undertaking much wanted, as being very necessary for the more Easy, Expeditious, and Right Understanding of Ancient Authors; *Principally designed for the Service of* SCHOOLS; and also useful to Persons of Riper Years who delight to read the Classicks.

Perform'd according to the Latest and most Exact Observations, and adapted to the ready Understanding of the Use of Ancient and Modern Maps together.

By *HERMAN MOLL*, Geographer.

THE

PREFACE.

IT'S no new Obſervation that Geography is as it were the Right Hand of Hiſtory; and that the Claſſicks, whether Greek or Latin, thoſe excellent Monuments of Ancient Learning, cannot rightly be underſtood without the help of Maps of thoſe Countries they treat of; hence it is that in all the valuable Editions of the Claſſicks, Maps have been fitted for them, tho' not ſo correct as could be wiſh'd, and yet commonly ſo dear as not to be purchas'd by the generality of School-Boys.

But that ſomething might be done of more univerſal Uſe as well as Cheapneſs to Scholars, a ſet of Curious Gentlemen in *France*, among whom there was a Learned Prelate, undertook this Work in good earneſt, and having brought it to as great a Perfection as the bigneſs of the Deſign would bear, the Compoſitions were put into the Hands of Monſ. *Du Val*, Geographer to the *French* King *Lewis* XIV. who was for ſome time Amanuenſis to the ſaid Biſhop, and publiſh'd it in 28 Maps of the old World and its ſeveral Empires, Kingdoms and Provinces, Chief Cities, Towns, Rivers, Mountains, *&c.* but as he has given *French* Terminations to moſt of the Ancient Places, which is a thing not ſingular in him with reſpect to his Countrymen, who have done the like upon other occaſions, 'tis what we thought abſolutely neceſſary to ſee rectify'd, and have therefore done it according to Mr. *Eachard*'s Claſſical Geographical Dictionary, *Cellarius*, and the Corrections of other learned Gentlemen now living, who aſſiſted in this Work.

PRÆFATIO.

Nemo eſt qui non videbit protinùs Tabellas iſtas Geographicas adornatas fuiſſe in uſum Scholaſticæ Juventutis. Omnes Novæ ſunt, confectæq; juxta nuperrimas, & accuratiſſimas Obſervationes: harum ſingulæ ſcalam habent Milliarium Britannicorum, quibus ſingulis ſexaginta ſunt Gradus. Ubi vero Gradus minutiores ſunt quam ut reſponderent uni Scalæ, uſi ſumus Mercatoris Projectione, eique accommodavimus ſcalam, de quâ videſis Orbis Tabulam N. 1. &c. Hâc poterunt Diſcentes facillimè Intervalla metiri, uſúmq; percipere tàm Antiquarum, quàm Recentiorum Tabularum. Neq; hoc loco prætereundum duco quàm proficuum hoc opuſculum futurum ſit etiam provectioris ætatis hominibus in Claſſicorum Lectione.

Huic etiam Compendio Quatuor novas ſubjecimus Tabulas: Unam, Civilium Bellorum Julii Cæſaris, & Pompeii Magni, N. 27. Alteram Itinerum Iſraëlitarum in Arabiæ Deſerto, una cum Deſcriptione Sanctæ Terræ, ſive Canaan, N. 31. Tertiam, Itinerarii Divi Pauli, aliorumq; Locorum, quorum ſit mentio in Teſtamento Novo. Vide N. 32. Quartam, Tabulam Aſiæ Antiquæ, primorumq; poſt Diluvium Populorum, N. 30. Hæc confecta eſt à Clariſſimo W. Stukeley, M. D. Regiæ Societatis Socio, quam ille nobis benigniſſimè impertivit, cui unà cum aliis viris doctis opem nobis ferentibus grates agimus meritiſſimas. In Ordinandis autem iſtis Tabulis nullam rationem poſitionis habendam exiſtimavimus, cùm hoc nullo modo neceſſarium fuerit noſtro Inſtituto, vel operis Legi. Tu verò, mi Lector, benè Conſule, & vale.

The PREFACE.

It's obvious that this Collection of New Maps is principally design'd for the Service of the Schools; they are all of 'em New, and laid down according to the lateſt and moſt exact Obſervations that have been made; each Map having a Scale of *Britiſh* Miles, 60 to One Degree; and where the Number of Degrees are too many to anſwer to one Scale, we have made uſe of *Mercator's* Projection, and fitted a Scale accordingly, for which ſee *Orbis Tabula*, N. 1. *&c.* Here the Scholar may meaſure Diſtances with Pleaſure, and naturally be lead to underſtand the Uſe of Ancient and modern Maps; neither muſt we omit the Improvement this Collection may likewiſe yield to thoſe of riper Years, who take Delight to read the Claſſicks.

We have added Four New Maps to this Collection, *viz.* a Map of the Civil War between *Cæſar* and *Pompey*, N. 27. The Journeying of the Children of *Iſrael* in the Wilderneſs, together with the Land of *Canaan*, *&c.* N. 31. The Travels and Voyages of St. *Paul*, and of the other Places mention'd in the Books of the New Teſtament, *&c.* N. 32. Another is the Scriptural Map of the Ancient *Aſia*, as Peopled after the univerſal Deluge, N. 30. which was much wanted, it is the Compoſition of the Learned Dr. *Stukeley*, Fellow of the Royal Society, who moſt generouſly preſented us with it, for the Incouragement of this Deſign, to whom we return our hearty Thanks, as we do alſo to the other Gentlemen, who gave us their Aſſiſtance in this Work.

As to the placing of the Maps, more regard has been had to the Connection and Relation they have to one another, in reſpect to Empires, Conqueſts, Situation of Countries, *&c.* and to Time, than to the Antiquity of the Authors, from whoſe Works they have been extracted; and foraſmuch as ſome of them differ from the reſt in Size, it could not poſſibly be avoided without cramping the Deſign.

EXPLANATIO

SCALÆ TABULARUM

A *MERCATORE* Projectarum.

ORBIS Tabula, Nº 1.

INvenire locorum duorum quorumcunque distantiam in hâc Tabulâ, per Scalam Leucarum Britannicarum, Gradibus Latitudinis omnibus inter 20 & 60 accommodatam, Lineis ex utroq; Scalæ latere numerandis; Quas Latitudinis Parallelas intersecant centenis Leucis lineæ a summo ad imum ductæ; adeò ut quæq; Parallela contineat Leucas quadringentas in eâ Latitudine quam exprimit Parallelæ numerus.

Exemplum 1. Si scire velis distantiam inter *Fretum Herculeum* sive *Gaditanum*, & *Pelorum Promontorium* sive *Fretum Faro ad Messinam*; intervallum duorum istorum locorum è Tabula desumptum applicetur Scalæ in Parallelâ graduum 35, eritq; intervallum quæsitum 350 leucarum.

Du Val in Tabulâ suâ Geographicâ intervallum hoc exprimit 500 Leucarum. Mare quoq; Mediterraneum 1100 Leucas longum reddit; cùm jam certum sit, non esse id ampliùs Leucarum 700.

THE EXPLANATION OF THE SCALE of those MAPS OF *MERCATOR*'s Projection.

ORBIS Tabula, Nº 1.

TO find the Distance between any two Places in this Map by the Scale of British Leagues, fitted from 20 to 60 Degrees of Latitude, as you see the Lines number'd up each side; the Lines that go from top to bottom, intersecting the Parallels of Latitude at every 100 Leagues; so that each Parallel contains 400 Leagues in the Latitude that the Parallel is number'd with.

Example. I desire to know the Distance between *Herculeum Fretum*, or the Streights Mouth, and *Pelorum Prom.* or the Streights of *Faro* by *Messina*; I extend the Compasses from one Place to the other, and applying them to the Scale upon the Parallel of 35, I find it is 350 Leagues.

Du Val in his Map of the World makes this Distance 500 Leagues; he also makes the *Mediterranean* to be 1100 Leagues long, whereas now by undoubted Authorities it is not above 700.
